

Dear Parents or Guardians,

Let me introduce myself. I am a graduate of Texas A&M University with a degree in Mathematics, and I am looking forward to a new school year as your child's teacher. This year will be an exciting time for all of us. I will give it my all to ensure your child's safety and success. I want my classroom to be an environment that is comfortable and a place that your child can show their vulnerability and creativity. We will study all aspects of Geometry in preparation for the successful completion of the state's standardized tests. I have planned many engaging activities throughout the course of the year that are designed to help your child succeed academically, not only for this year but also in the future.

Students and their parents or guardians are naturally curious about the amount and types of homework to be assigned this term. There will be homework assignments on Thursday nights. These assignments will be due at the door of my classroom on Friday. You should expect to see your child spending 30 to 45 minutes working on assignments or studying for class the next day. All homework assignments will be purposefully designed to help your child reach mastery of a specific learning objective. I will grade fairly and give as much feedback necessary to help your child succeed.

If you have any questions or wish to talk with me about your child, please feel free to email me at _____ or to call me at the school. Our number is _____. You can also set up a time to meet with me anytime.

I am looking forward to working with my new students this year. I am also looking forward to meeting you and working with you to help your child succeed. I have a feeling that

we will be a powerful stronghold for your child's successful future if we can work together effectively!

Best wishes,

Ms. Phares
